Ref. OUT-113

Water-oil separator filter for compressed air

25 µm filter that removes water and oil from compressed air to prevent blistering and cratering.

Water-oil separator filter that ensures clean, pure compressed air. Moisture and oil cause paint defects such as blistering and cratering; clean, dry air is essential for a consistent finish. It also extends the service life of equipment.

Technical specifications

Filtration rating	25 µm
Fluid temperature	5 to 60 °C
Dimensions	23 × 17 × 8 cm

How to use

- Air treatment for the spray booth air line
- Prevention of cratering and blistering
- Protection of air tools

Packaging and delivery

Version	Reference
—	OUT-113
